## Antiseptica Sano Soft:

**Now also available in a 500 ml bottle!**

Our proven skin care product Sano Soft is now available not only in the 150 ml tube, but also in a 500 ml bottle.

Sano Soft is absorbed quickly and is well suited as a mild skin care product for dry and stressed skin, especially when the skin is exposed to occupational and environmental stress. It may be used for all skin types, including very sensitive skin.

Just like our skin protection product Dermo Safe, Sano Soft is free of colorants, perfumes and parabens, contains high-quality care substances, absorbs quickly and leaves no oily film. Selected rich and mild care substances ensure a smooth skin.

This skin care product should be applied sparingly to the skin areas to be cared for several times a day, especially after work, before long breaks and during leisure time. In case the skin is extremely stressed, Sano Soft can of course be used more frequently.

Since hands are often particularly stressed in health care and skin diseases are among the most common occupational diseases there, the use of skin protection and skin care products is also strongly recommended by professional associations. Products that do not contain colorants and fragrances should be preferred, as this can significantly reduce the risk of developing allergies.

Sano Soft skin care product:  
6 x 150 ml tubes / carton

**Now new:**  
18 x 500 ml bottles / carton

If you have any questions, please do not hesitate to contact us.
